

Martha Ayala

Introduction.
Did you know that people who live in shelters
in NYC are not allowed to cook? This is bad
and there are other problems in NYC too.
We can change NYC if we try.

Body 1
We can change NYC if we
try. One beautiful change could be that
NYC should have some houses and
not only tall buildings. For example if
you guys don't remember the twin
towers that they were so tall that
an airplane crashed on them.

Body.2

We can change New York City if we try. For example people who need a place to live should get a whole apartment not just a hotel room this is important because some family don't fit in one room if they give space to the family maybe they would work more quietly. Another problem is that there is no kitchen, so family's can cook. Another example is they should include more mirrors for the family too look at them self.

Body.3

We can change NYC if we try. NYC need more people to have more parks for kids to play in, one reason is that people should have their kids have more fun having a new park and then working in school work so happy and saying thank you. Another reason is that we workers need too have parks at least does to their house's because some people need to go too work and the park is too far they can't take them. A final reason is that we should have a park that has new games or equipments for the kids to have more fun then they ever had.

conclusion

We can change NYC if we try. Construction worker can build small houses and tall buildings that's how it is in ~~Florida~~ Orlando Florida and it doesn't look the same as NYC it looks more ~~Beautiful~~ Also, Mayor ~~de~~ Blasio ~~should be~~ should change the hotel rooms or chelsters into a mini house. Finally, parks are so special because they make the kids really ~~happy~~ happy. So we **should have**

More parks.
